IMPORTANT NOTICE FOR BUILDING PERMIT HOLDERS REGARDING

“NOTICE OF CONSTRUCTION TYPE” LABELS AND NOTIFICATION TO THE FIRE DEPARTMENT

Effective January 1, 2015, pursuant to § 382-b of NYS Executive Law, Part 1265, a mandatory labeling system is now part of the protocol for the issuance of building permits for new residential buildings and additions, renovations and rehabilitation of existing buildings. The labels detail the roof and floor construction. A label must be affixed to the electric meter or on an exterior wall adjacent to the meter or in a conspicuous place on the exterior of the residence as may be determined by the building inspector.

The label informs the Fire Department or other first responders in case there is a fire, what the roof and floor construction consists of before a responder enters in or upon the building. Knowing the type of construction helps the responders in their efforts and promotes their safety. The label must be affixed prior to the Village issuing a Certificate of Occupancy or a Certificate of Compliance for the building.

The property owner is responsible to supply the label(s) and maintain the clear visibility of label making sure nothing obstructs the label. The property owner is responsible to insure the integrity of the label and must replace it in the event the label fades, is no longer legible or is destroyed.

The property owner can check with their NYS licensed design professional as to which label is appropriate and/or where to purchase a label.

Labels may be purchased on line at various websites. One such website is:

<http://www.safetysign.com/products/p5983/ny-type-v-floor-roof-truss-sign>

IN ADDITION:

In addition, form VS-46 (01-15) is required to be filed with the Village Building Department when an application for a permit is filed or upon final inspection. Form VS-46 is attached.

VS-46 A (01-15)
